flow charts (the dumbed down, lazy vers)

Number Analyzer:

Number -> Detect if it's even or odd -> "Even"/ "Odd"

While Loops Practice Pt 2:

Number typed in -> detect if number is between 1-100, detect if it is greater than, less than, or equal to the mystery number -> print out either "too low" "too high" "correct" or "invalid input"

Simple console quiz game:

Type in answer -> detect if it matches up to the desired answer choice -> print either "correct" or "incorrect"
